REF: REQUEST FOR WORKSHOP ACCESS AND EQUIPMENT UTILIZATION FOR THE “PROBITY” MARS ROVER PROJECT

Dear Sir,

I hereby formally request permission to access the university workshop facilities and equipment in support of the **Probity Mars Rover Project**, being developed for the **Cars4Mars Competition**.

Project Overview

The Probity Project involves the design and fabrication of an autonomous Mars rover prototype aimed at demonstrating advanced student capability in robotics, mechanical design, and space-oriented engineering applications.

The fabrication of the rover chassis and associated mechanical components will strictly follow the approved design specifications as illustrated in the attached reference image (1000486128.jpg). To successfully execute this phase, we request access to the **Fitting Workshop** (cutting, drilling, and filing operations) as well as the **Welding Workshop**.

Team Structure and Work Schedule

The project team consists of **11 students**, who will operate under a controlled shift system to ensure compliance with workshop safety regulations and to prevent overcrowding. We propose scheduled access on **Mondays, Wednesdays, and Fridays**, for sessions of approximately **four (4) hours** per day, or as may be adjusted by the workshop management.

Project Team Members

#	Name	Registration Number
1	Wogambula Jude Nandala	ENM221-0260/2023
2	Munene Dorris Wambui	ENM221-0046/2023
3	Joel Hawi	ENM221-0059/2023
4	Derick Oloo	ENM221-0074/2023
5	Victor Kinyua	ENM221-0055/2023
6	Andrew Njoroge	ENM221-0054/2023
7	David Thuita	ENM221-0222/2023
8	Zahra Odula	ENM221-0271/2023
9	Mical Amukoah	ENM221-0052/2023
10	Wandugu Alex Thiong'o	ENM221-0043/2022
11	Carol Omondi	ENM221-0181/2023

Commitment

All required materials and consumables will be sourced externally. The team's request is strictly limited to access to institutional workshop facilities, machinery, and technical supervision where necessary. All safety protocols and workshop regulations will be fully observed at all times.

We respectfully seek your approval to proceed with the fabrication phase of the project at the earliest convenience.

Yours faithfully,

Jude Nandala Wogambula
Project Lead
